

Elk Falls Mill site June 2022

Walter Jakeway, ex Production Manager at Elk Falls, forwarded some information on the company which now owns the old Elk Falls website.

Much of the old pulp and paper equipment has been removed and 100 test holes were drilled to test for contamination. All tested clear except for one hole a couple of miles from the mill.

There are a number of different companies using mill facilities for machine shops, ship repair, etc.

The new owner, Hong Kong-based New Times Energy, calls the site “Discovery Industrial Park Canada”.
